

NyGuard® IGR Concentrate is an insect growth regulator (IGR) that mimics the juvenile hormone, preventing more than 50 immature insects from developing into reproductive adults.

- Long-lasting residual activity
- Can be tank mixed with adulticides to control immature and adult insects
- Photostable so it will not rapidly degrade in sunlight
- EPA reduced risk status for food handling areas

PRODUCT SPECIFICATIONS

Key Target Pest(s)	Cockroaches, darkling beetles, house flies, mosquitoes, fleas and stored product pests
Signal Word	Caution
Form	Concentrate
Active Ingredient(s)	Pyriproxyfen
Class of Chemistry	Juvenile hormone receptor modulator (7C)
Activity	Insect growth regulator, residual
Mode of Action	Disrupt and prevent metamorphosis
Stability	If frozen, thaw and shake before use
Flammability	Not listed as flammable or combustible
Odor	Sweet
PPE Requirements	None listed
Retreat Interval	Reapply when insect populations reach economic threshold levels
Mix or Dilute In	Water; Water or oil (ULV applications)
Shelf Life	3 years or more in ideal storage conditions

Packaging

- 140ml unit (10 per case)
- 480ml unit (6 per case)
- 1 gallon unit (2 per case)

Use Sites

Indoor and Outdoor Areas

- Residential homes
- Commercial buildings
- Food and non-food areas
- Landscaping, lawn and turf
- Exterior perimeters

Livestock Areas

- Livestock housing
- Poultry housing

On and Over Poultry

Application Methods

- Indoor and outdoor broadcast
- Foliar sprays
- Surface sprays
- Space sprays
- Spot, crack/crevice treatments
- Void injection
- Foam
- Band

Recommended Equipment

- Handheld or backpack sprayers
- Backpack mist blowers
- Mist sprayers
- Power sprayers
- ULV foggers

How NyGuard® IGR Concentrate Breaks the Life Cycle of Your Toughest Insects

Effects of NyGuard exposure on different insect life stages

Insects with complete metamorphosis, such as: Darkling beetles, fleas, flies, mosquitoes, and stored product pests	 Egg Stage	 Larval Stage	 Pupal Stage	 Adult Stage
	<ul style="list-style-type: none"> • Mortality 	<ul style="list-style-type: none"> • Permanent larval stage • Reduced fitness • Increased susceptibility to non-IGR insecticides • Sterility in adult stage if development continues 	<ul style="list-style-type: none"> • Death • Morphological defects • No adult emergence 	<ul style="list-style-type: none"> • Reduced egg production • Decreased viability of eggs
Insects with incomplete metamorphosis, such as: Cockroaches and crickets	 Egg Stage	 Nymphal Stage		 Adult Stage
	<ul style="list-style-type: none"> • Mortality 	<ul style="list-style-type: none"> • Permanent nymphal stage • Reduced fitness • Increased susceptibility to non-IGR insecticides • Morphological defects • Behavioral changes- more active in daylight • Death • Sterility in adult stage if development continues 		<ul style="list-style-type: none"> • Reduced egg production • Decreased viability of eggs

MGK Sustainability in Action

- Formulation concentrated to reduce transportation carbon emissions
- Container is HDPE and 100% recyclable
- The product is formulated to be effective using small quantity of product
- Formulated in a production facility that uses 100% renewable energy
- Shipping cartons and paper labels are sourced from Sustainably Managed Forests
