Vendetta[®] PLUS
COCKROACH GEL BAIT

Vendetta[®] Plus Cockroach Gel Bait combines two modes of action to kill German cockroaches where they hide while NyGuard[®] IGR helps break the life cycle by preventing reproduction. Its palatable bait matrix is effective on both bait-averse and non-averse German cockroach populations, making it an excellent choice for even severe infestations.

Features and Benefits

- Breaks the life cycle of German cockroaches to help reduce populations by preventing reproduction
- Suitable for use in sensitive accounts, including food handling areas while in operation*
- Delivers consistent performance across a wide range of dietary conditions
- Maintains consistency in high-heat environments for clean, precise applications

*Can not come into contact with food utensils or food prep areas that may become contaminated

Best Practices When Using Vendetta Plus Cockroach Gel Bait

To assess bait aversion, place small amounts of different cockroach baits on a business or index card near a harborage area and monitor bait consumption. If cockroaches consistently consume one bait over the others, bait aversion may be present.

Cockroach Bait Solutions That Work Together
