

Decimari® Fly Bait combines clothianidin and NyGuard® IGR to provide two ways to control flies. The inclusion of an insect growth regulator (IGR) allows the bait to control both adult and immature flies, which reduces the population over time.

Features and Benefits

- Unique formulation attracts both male and female adult house flies
- Contains NyGuard® IGR for dual modes of action to target the entire fly population
- Versatile application methods of scatter, paint-on or bait station allows effective use across multiple surfaces where flies rest and breed.

PRODUCT SPECIFICATIONS

Key Target Pest(s)	House flies
Signal Word	Caution
Form	Granular fly bait
Active Ingredient(s)	Clothianidin; Pyriproxyfen
Class of Chemistry	Neonicotinoid (4A); Juvenile hormone receptor modulator (7C)
Activity	Ingestion; Insect growth regulator
Mode of Action	Nicotinic acetylcholine receptor competitive modulator; Disrupt and prevent metamorphosis
Stability	If frozen, rewarm before use; Avoid storing open container in moist conditions
Flammability	Not listed as flammable or combustible
Odor	Sweet
PPE Requirements	Long pants, long sleeves, shoes and socks
Retreat Interval	3-5 days or as bait is consumed
Mix or Dilute In	Ready to use; water dilution optional
Shelf Life	3 years in ideal storage conditions

Packaging

- 5 lb unit (4 per case)
- 40 lb unit

Use Sites

Indoor and Outdoor Areas

- Residential homes
- Commercial buildings
- Food and non-food areas

Livestock Areas

- Livestock housing
- Poultry housing
- Feedlots

Application Methods

- Scatter
- Bait station
- Paint or spray on

Recommended Equipment

No restrictions on equipment for application of Decimari. Options include:

- Granular spreaders
- Bait stations approved for fly baits
- Paint brush
- Handheld sprayers

Mix Rates

- Mix 6.3 ounces (approximately 1 cup) per 1,000 sq. ft.
- For paint or spray on applications – Mix 1.6 ounces (approximately 4 Tbsp) of bait with warm water until the desired consistency is achieved, typically 1-4 ounces of water

Recommended Application Sites

Decimari Fly Bait can be used in areas where other premise products are applied.

Examples include but not limited to:

- **Residential and commercial areas** – garbage areas, dumpsters, loading docks
- **Dairy facilities** – drive lanes, outside pens, milking parlors, in and around pits and lagoons
- **Equine facilities** – manure piles, composting piles, alleyways and drive lanes, in and around stables
- **Poultry facilities** – concrete pits, walkways, walls and joists
- **Swine facilities** – concrete pits, walkways, walls and joists

MGK Sustainability in Action

- Container is HDPE and 100% recyclable
- Formulated with bitter ingredients to help protect against consumption by pets and children
- Formulated without Big 8 allergens (includes soy)
- Specifically palatable for flies for targeted application
