

Technical Bulletin

SUMARI
ant gel bait

Sumari® Ant Gel Bait features an attractive bait matrix that starts killing within 24 hours. Worker ants carry the bait back to the colony, where it is shared with other workers, larvae and the queen to target the colony at its source.* Designed for use alongside Sumari® Insecticide Concentrate, Sumari Ant Gel Bait provides targeted control as part of a comprehensive ant management program.

Features and Benefits

- Controls a broad range of ants, including Argentine, odorous house, pavement and ghost ants
- Remains palatable for up to 90 days**
- For indoor and outdoor use
- Labeled for use in food handling areas
- Easy-to-apply gel for targeted spot and crack-and-crevice treatments

Product Specifications

Key Target Pest(s)	Ants***
Signal Word	None listed
Form	Gel bait
Active Ingredient(s)	Clothianidin
Class of Chemistry	Neonicotinoid (4A)
Activity	Ingestion
Mode of Action	Nicotinic acetylcholine receptor competitive modulator
Stability	If frozen, rewarm before use. Extended storage in high heat may cause bait to darken in color.
Flammability	Not listed as flammable or combustible
Odor	Sweet
PPE Requirements	None listed
Retreat Interval	None listed
Mix or Dilute In	Ready to use
Shelf Life	1 year or more in ideal storage conditions

Packaging

- Clamshell unit (4 x 30 gram tube, 5 per case)

Use Sites

Indoor and Outdoor⁺ Areas

- Residential homes
- Commercial buildings
- Food and non-food areas

Livestock Areas

- Livestock housing
- Poultry housing

Application Methods

- Spot treatment
- Crack and Crevice

* Excluding fire, Argentine, harvester, carpenter and pharaoh ants

** Excluding fire, harvester, carpenter and pharaoh ants

*** Excluding fire & carpenter ants

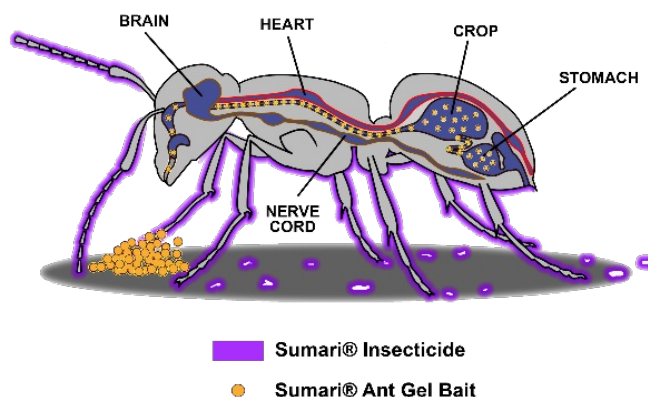

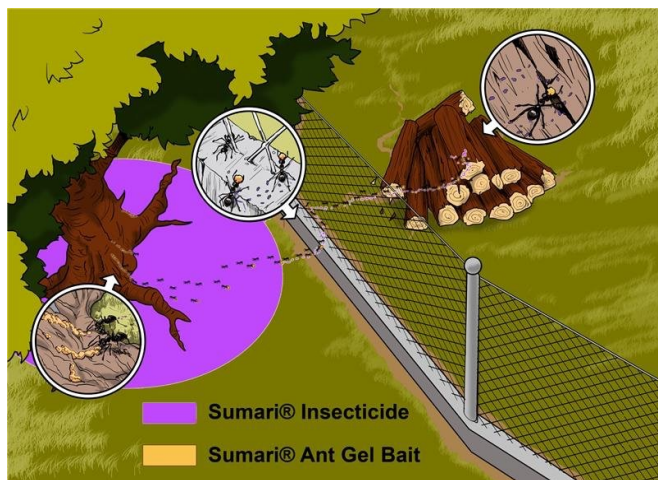

+ Adjacent to home or structure

Bait Placement

- Focus bait placements near active foraging trails, nest sites or other areas of ant activity.
- Apply a minimum of 1 gram of bait as individual spots or small lines. For lines, apply approximately 1/8" wide × 4" long (1 gram); up to 12" long (3 grams) for highly active foraging trails.
- Use spots rather than lines to increase the feeding area.
- For best results, place bait out of direct sunlight.

Comprehensive Ant Control with the Sumari System

The attractive bait matrix of Sumari Ant Gel Bait and non-repellent, water-based Sumari Insecticide Concentrate work together to provide a comprehensive approach to ant control. Worker ants carry the bait back to the colony, where it is shared with other workers, larvae and the queen, while Sumari Insecticide Concentrate targets ants in treated areas. Together, the two products provide complementary baiting and perimeter treatments to help control ants where they forage and where they live.*

*Excluding fire, Argentine, harvester, carpenter and pharaoh ants

MGK Sustainability in Action

- MGK prioritizes the advancement of sustainable packaging
- Formulated in a production facility that uses 100% renewable energy
- Syringe, piston and plunger are 100% recyclable
- Shipping cartons are sourced from Sustainably Managed Forests
- Formulated without Big 9 allergens
