

SUMARI TRITON

ant gel bait

CLOTHIANIDIN

GROUP

4A

INSECTICIDE

Specimen Label

- Triple bait technology, contains 3 food sources for ants
- Kills the colony within two weeks (excluding carpenter, fire and harvester)
- Kills ants for up to 30 days
- Bait is attractive to ants (including carpenter, fire, harvester and pharaoh)
- Satisfies multiple nutritional needs of ants in one bait

ACTIVE INGREDIENTS:

Clothianidin	0.01%
OTHER INGREDIENTS	99.99%
	100.00%

KEEP OUT OF REACH OF CHILDREN

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For information regarding medical emergencies or pesticide incidents, call 1-888-740-8712.

See Inside for Precautionary Statements

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS:

- Not registered for use on trees in the State of California.
- **DO NOT** apply to humans, animals, clothing or bedding.
- **DO NOT** contaminate feed or food products, food preparation surfaces, dishes, kitchen utensils or food containers.
- **DO NOT** APPLY ANY BAIT IN COCKPIT AREAS OF AIRCRAFT.
- Use only in areas inaccessible to children, pets and other non-target organisms.
- Only for spot and crack and crevice application.
- **DO NOT** apply gel bait in areas where repellent insecticides have recently been used.
- **DO NOT** place gel bait in locations that are routinely washed, as bait will be removed by washing.
- **DO NOT** deposit gel bait onto exposed surfaces. If bait contacts exposed surface, remove bait and wash exposed surfaces.
- **DO NOT** apply to surfaces where the temperature exceeds 120-130°F because this could cause the gel bait to liquefy.
- **DO NOT** apply gel bait to food preparation surfaces or to areas where food utensils may become contaminated.

INSECTS KILLED:

Ants. Includes: acrobat, Argentine, bigheaded, carpenter, cornfield, tawny crazy, field, fire, ghost, harvester, honey, little black, odorous house, pavement, pharaoh, pyramid, rover, thief and white-footed ants.

WHERE TO USE:

FOR USE IN RESIDENTIAL, INSTITUTIONAL, COMMERCIAL AND INDUSTRIAL AREAS AND TRANSPORTATION EQUIPMENT:

Use sites include single- and multi-family residential buildings, schools, commercial and industrial establishments, aircraft, trains, ships, boats, and buses.

BEFORE YOU USE / APPLY

Inspect infested areas carefully to determine overall infestation levels, locations of foraging, nesting areas and most appropriate application points.

Removing food and water sources helps with bait acceptance.

Station Specifications

- Bait stations should be a minimum of 4 1/16" long and 3 1/4" wide
- Openings in the station should be a minimum of 7/8" wide and 7/16" high
- The station should contain a minimum of 1.0 g of bait

PESTICIDE RESISTANCE MANAGEMENT

Sumari® Triton Ant Gel Bait contains a Group 4 insecticide. Insect biotypes with acquired resistance to Group 4 may eventually dominate the insect population if Group 4 insecticides are used repeatedly or in successive years as the primary method of control for targeted species. This may result in partial or total loss of kill of those species by Sumari Triton Ant Gel Bait or other Group 4 insecticides.

To delay insecticide resistance, consider:

- Avoiding the consecutive use of Sumari Triton Ant Gel Bait or other Group 4 insecticides that have a similar target site of action, on the same insect species.
- Basing insecticide use on a comprehensive IPM program.
- Monitoring treated insect population for loss of field efficacy.

Contact your local extension specialist, and/or manufacturer for insecticide resistance management and/or IPM recommendations for the specific site and resistance pest problems.

USE INSTRUCTIONS

Sumari Triton Ant Gel Bait is only for the control of ants as a spot or crack and crevice treatment in areas inaccessible to children or pets.

Syringe Application:

1. Remove the cap from the nozzle, attach tip, touch the tip to the surface to be treated, and push down on the plunger. Apply bait as a 1 gram dot. Recap the dispenser after treatment is completed.
2. Place bait in cracks, crevices, corners and locations where ant traffic is observed and nesting areas are suspected.
3. Inspect bait placements periodically and apply fresh Sumari Triton Ant Gel Bait as needed.

Maxforce Refillable Bait Stations or Equivalent Station Design:

1. Fill reservoir of commercially available bait station with a minimum of 1 gram of Sumari Triton Ant Gel Bait not to exceed the capacity of the reservoir.
2. Affix content identification sticker on exterior of the station.
3. Place filled and sealed bait station near ant foraging trails or other areas where ants are known to forage or nest.
4. Inspect bait station placements periodically and refill Sumari Triton Ant Gel Bait stations as needed. It is best to replace bait stations before they are completely consumed.

DO NOT apply to areas that are routinely washed (such as countertops) as bait may be removed or diluted and spread onto the surface.

If the area to be treated has been recently treated with repellent insecticide, thoroughly clean the area before applying bait. **DO NOT** spray repellent insecticide over gel as this may cause the bait to become repellent.

INDOOR HOW TO USE / APPLY

Commercial, Institutional and Industrial:

Indoor applications in areas inaccessible to children and pets include cracks and crevices along walls or floors, behind or under equipment or appliances, under tables, within framing of tables or furniture, around sinks, within or near garbage collection areas.

Applications in Nonfood Areas of Food Handling Establishments:

Sumari Triton Ant Gel Bait is designed for use as a spot or crack and crevice treatment to control ants in areas inaccessible to children and pets in the nonfood areas of commercial, industrial, public and institutional buildings/structures, including restaurants, warehouses, food processing plants, supermarkets, hospitals, nursing homes, motels, hotels, schools, laboratories, computer facilities, aircraft, buses, boats/ships, trains, pet shops and zoos.

Nonfood areas include areas such as garbage rooms, lavatories, floor drains (to sewers), entries, vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after bottling or canning). Refer to next section for use directions and restrictions when making applications in food areas of food handling establishments.

Applications in Food Handling Areas:

Apply only as a crack and crevice treatment to food areas inaccessible to children and pets of food handling establishments. Apply Sumari Triton Ant Gel Bait by placing the bait dispenser tip directly into cracks, crevices, holes and similar openings where ants are found or are entering. Food handling areas include areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage, and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas are also considered a food area when food is exposed and facility is in operation. **DO NOT** apply bait to areas where food utensils or processing surfaces may become contaminated.

Residential:

Sumari Triton Ant Gel Bait is designed for use as a spot or crack and crevice treatment to control ants in residential structures in areas that are inaccessible to children and pets. Indoor applications include cracks and crevices along walls or floors, behind or under equipment or kitchen appliances, under tables, around sinks, within or near garbage collection areas, attics, crawl spaces and cracks and crevices in cabinets.

DO NOT apply gel bait to areas where food utensils or processing surfaces may become contaminated.

OUTDOOR (Adjacent to home or structure)

HOW TO USE / APPLY

Commercial, Institutional, Industrial and Residential:

- A thorough inspection around a structure may reveal areas where ants are gaining access to the structure.
- Place gel bait on, into or adjacent to structures where ants are observed, adjacent to ant trails and to areas where ant activity is suspected.
- Apply Sumari Triton Ant Gel Bait as 1 gram dots to pest entry sites adjacent to homes or structures, such as along windows, doors, between construction elements, sewer areas, adjacent trees* which harbor ants, along walls, garbage holding areas or suitable placement sites acting as an ant harborage.
- Not registered in the State of California for use on trees.

HOW MUCH TO USE / APPLY

Syringe Applications

- Apply Sumari Triton Ant Gel Bait as 1 gram dots near active foraging trails, nest sites or to areas known to be active without disrupting the ants to ensure the ants take the bait back to the nest.
- Inspect Sumari Triton Ant Gel Bait placements periodically and apply fresh bait as needed.

Figure 1 Dot of gel approx. 1 gram

Station Applications

- Place up to 5 stations per room for light to moderate infestations. For heavier infestations, additional stations may be added. Stations should be checked and refilled with Sumari Triton Ant Gel Bait if fully consumed and ant activity persists.

PRECAUTIONARY STATEMENTS

ENVIRONMENTAL HAZARDS

This product is toxic to aquatic invertebrates, fish and wildlife. **DO NOT** apply directly to water or to areas where surface water is present or to intertidal areas below the mean high-water mark. **DO NOT** contaminate water when cleaning equipment or disposing of equipment washwaters. **DO NOT** apply where runoff is likely to occur. Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas.

PHYSICAL OR CHEMICAL HAZARDS

DO NOT apply this product in or around electrical equipment due to the possibility of shock hazard.

STORAGE AND DISPOSAL

DO NOT contaminate water, food, or feed by storage or disposal.

STORAGE:

Store in a cool, dry place. Always store pesticides in the original container. Store away from food and pet food.

PESTICIDE DISPOSAL AND CONTAINER HANDLING:

Non-refillable container. **DO NOT** reuse or refill this container.

If empty:

Place in trash or offer for recycling if available.

If partly filled:

Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
