# Fewer Mosquitoes Makes Everything Better

Grilling out. Gardening. Spending time outdoors with family and friends. Everything is more enjoyable in your outdoor space when you're not swatting pesky mosquitoes. Now there is an easy way to have your yard all to yourself.

## Behold the Power of Outdoor Misting Systems

Outdoor misting systems create a gentle mist through a series of nozzles strategically placed in areas of your yard where coverage is desired. When you want to enjoy the outdoors and all it has to offer while protecting your family at the same time, consider mosquito protection. Don't let mosquitoes ruin the fun – turn your outdoor space into a bite-free zone.

**Make mosquitoes disappear automatically with a professionally serviced misting system.**

## Why it Pays to **Call the Professionals**

Many homeowners are dissatisfied with the mosquito control products they purchase at retail. Professional services are expanding rapidly across the United States as homeowners are learning more about this service.

- Creates a barrier around the home and yard
- Hassle-free programmable automatic timed release
- System is customized to fit your home and landscape
- Serviced by your mosquito control professional — frequency will vary based on the size of the system
- Effective against other pests such as flies, ticks and fleas
- Convenient mosquito protection all year round
